

1 INDIRA PATEL, M.D.

2 Q. Right, and I just want you to
3 tell me what were the facts that you had
4 before that led you to the conclusion that
5 the patient may be a danger to himself?

6 MR. MCANDREW: I'll object to
7 the form. Aside from what she's
8 already told you --

9 MR. SMITH: No. I want to know
10 the whole universe.

11 MR. MCANDREW: Totality. Asked
12 and answered, but over objection. Give
13 him every fact that made you thought
14 the patient was dangerous to himself or
15 others.

16 A. The patient had barricaded
17 himself. They had to break up his door to
18 bring him out. When he went in he was --
19 they had to chase him -- he tried to run
20 away. They had to chase him to bring him to
21 the medical emergency room. He was
22 uncooperative with the medical treatment in
23 the medical emergency room. He was agitated
24 and uncooperative and that gives me a clue
25 that he needed further evaluation.
